PROFESSIONAL SUMMARY

ECE graduate with a solid foundation in Python and backend web development. Built and deployed a full-stack web application using Django, SQL, and Bootstrap, with hands-on experience in ORM-based database design, server-side logic, and live deployment. Comfortable working with relational databases and Python scripting. Looking to grow as an entry-level Python Backend Developer.

TECHNICAL SKILLS

Languages	Python, SQL, HTML, CSS
Backend	Django, Django ORM, Server-side Logic
Database	MySQL, SQLite, Relational Schema Design, SQL Queries
Frontend	Bootstrap, HTML, CSS
Tools	Git, VS Code, PythonAnywhere, Jupyter Notebook

PROJECTS

E-Com — Full Stack Web Application

2025

Django, Python, MySQL, Bootstrap, HTML/CSS, PythonAnywhere

- Built a full-stack e-commerce web application inspired by Amazon — implemented product listing, search, and cart management modules using Django.
- Designed a normalized relational database schema using Django ORM; handled server-side business logic for cart operations and product management.
- Deployed the application live on PythonAnywhere, managing configuration, static files, and database setup in a production environment.

Retail Sales Insights — Python & SQL

2025

Python (Pandas), SQL, Jupyter Notebook

- Wrote Python scripts using Pandas to clean and transform raw e-commerce order data — handled missing values, fixed data types, and prepared datasets for SQL ingestion.
- Built SQL queries using CTEs, window functions, and aggregations to extract business insights such as top products, category growth, and monthly revenue trends.

Automatic Number Plate Recognition — Python Pipeline

2023

Python, YOLOv8, OpenCV, Tesseract OCR

- Developed a Python-based end-to-end pipeline integrating YOLOv8, OpenCV, and Tesseract OCR to detect vehicles and extract license plate text from video streams.
- Results logged to CSV for downstream use, demonstrating data handling and pipeline scripting in Python.

EDUCATION

B.E. Electronics & Communication Engineering — Anna University

2022 – 2026

Sri Venkateswaraa College of Technology | CGPA: 7.51 / 10

Higher Secondary (HSC) — Tamil Nadu State Board

2022

V.H.N Hr. Sec. School | 75.16%

SSLC — Tamil Nadu State Board

2020

V.H.N Hr. Sec. School | 66.66%

CERTIFICATIONS & ACHIEVEMENTS

- Python for Everybody — University of Michigan, Coursera
- Winner — Internal College Hackathon (Image Classification)
- International Conference — Presented at Peri College (Smart Streetlight Fault Detection)
- IoT Workshop — IIT Madras (Mini Robotic Arm)
